

US FLASHPOST®

Portable Illumination for Emergency Response Teams

FlashPost® Safety Deployment Systems are designed to alert approaching vehicles to slow down, move over or stop.

US FlashPost® exclusive design and ability to be seen day or night takes incident management to a whole new level. Spend more time assisting those in need instead of directing traffic.

Key Benefits:

- Alert and Warn approaching motorists and pedestrians about emergencies.
- Guide vehicles and pedestrians away from dangerous areas.
- Highly reflective and durable.
- LED lights provides a Clear Line of Sight.
- Replaces flares with bright elevated 10-pattern LED lights.
- Post can be filled with sand or water to insure wind resistance.
- EZ to store, EZ to deploy.
- Options include: Directional Arrows, Signs and Your Logo.
- Multiple Applications. (Review our brochure).

US FlashPost® are designed to enhance the visibility of your traffic control area while providing improved safety for your personnel and equipment.

US FlashPost® an innovative visual solution to re-direct, slow down, or stop vehicles or people from entering dangerous areas.

Visible from 3,000 feet, the US FlashPost® has a built in high intensity PowerFlare LED flashing strobe for long range visibility alerting approaching motorists and people of hazardous conditions and control areas.

Manufactured with high impact, self reforming properties withstand crushing and bending forces without destruction. The US FlashPost® can withstand temperatures from -40 to 140 degrees F allowing use in all weather conditions

REFLECTIVE

VEHICLES & PEDESTRIANS

US FLASHPOST

US Reflector and PowerFlare have jointly designed a new product for enhancing the safety of your environment. A US FlashPost is an "ALL-IN-ONE" safety device that commands attention. The post includes a high intensity PowerFlare with 16 LED lights with 10 user-selectable patterns, two reflective bands and an interchangeable sign on top. Easily ballasted with sand or water, the post can be weighted from 5 to 45 pounds to resist storm winds or drafts from passing trucks or landing helicopters

US FLASHPOST and POWERFLARE sets a new standard by taking illumination such as flares 'off the ground' and moving 'to a higher level'.

US FlashPosts can be equipped with logo's and arrows in any combination, tailored to your organization's identity.

Your Agency or Company can set a new standard for safety and increase driver awareness and personal safety by utilizing these new Powerflare US FlashPosts. Several colors and optional signs are available for Command Posts, First Responders and Incident Management Groups.
