

RECTANGULAR

Glass bead reflectors for applications that are subjected to impacts and abuse.

REFLECTORS

Long lasting Glass Bead reflectors are built into an extremely durable semi-flexible support making them virtually indestructible. Cylindrical reflectors are available in two (2) types, with and without holes.

Reflectors without holes require adhesive or double sided tape for installation.

How they reflect:

Unlike prismatic reflectors with molded prisms, glass bead technology reflects light similar to a mirror. The form and shape of the bead allow entering light to project itself in a wide angle, thereby creating a "Cat's Eye" effect. Available in all colors.

REFLECTORS WITH MOUNTING HOLES

ITEM # Size Elements
3364 4.7"x3.15" 346

ITEM # Size Elements
3362 4.7"x3.15" 190
