

**PAVEMENT MARKERS** Adapting to today's demands for retroreflectivity.

**PAVEMENT MARKERS**

Proven studies show that reflective road studs are among the most effective safety products in all adverse weather conditions. US Reflector Road Studs offer optimum lane identification in all weather conditions. They are visible and can be heard and felt, due to the rumble when a vehicle crosses them. Installed on thousands of miles of roadways throughout the world. Tire action facilitates the self-cleaning feature, keeping the reflective surface clean and brilliant. Road Studs offer a low cost alternative for enhancing roadways and turns. Retroreflection increases visibility which, in turn, increases safety.

**PAVEMENT STUDS**

**STREET LEVEL MARKERS TCB-1**

**DIMENSIONS**  
Length 4" Width 4" Height 0.75"

TCB-1 pavement markers are designed with a high power reflective lens set into a non aggressive rounded shoulder incline for smooth roll over.

The TCB-1 is shatter proof, with a special hard coat protecting the prismatic lens from abrasion. Angled prisms provide optimum night visibility.

TCB-1 Pavement studs are available in single and double sided reflective lens.

Colored housing with matching lens for day time visibility.

Adhesion: Stick-fast instant pre-cut Butyl pads, Hot melt or adhesive can be used.

Colors: white, amber, blue, green and red. Combinations: red-amber, red-white.

Color	Color	Item #	
		Double	Single
white	white	0312-VVV	0310-W
amber	amber	0312-AA	0310-A

**STREET LEVEL MARKERS TCB-5**

**DIMENSIONS**  
Length 3.94" Width 3.94" Height 0.7"

Highly reflective "Cat's Eye" road studs reflect light similar to "LED" type lighting.

The TCB-5 provides durability and longevity when installed in areas of significant traffic flow or in dry, sandy climates.

Shatter proof, the TCB-5 outlasts most markers by its unique one piece design. Manufactured with 45 glass elements on each face for optimum visibility.

TCB-5 has recessed "grabbers" for easy installation. Colors: white, amber, blue green, red and fluorescent yellow.

TCB-5 pavement studs are available in single or double sided lens units.

45 Glass elements per side

**STREET LEVEL MARKERS TCB-10**

**DIMENSIONS**  
Length 8.6" Width 3.94" Height 1.57

City Studs are designed for both permanent and temporary applications such as curbs, tunnels, bridges and rotaries. Divide bus and taxi lanes from free-flow traffic.

Highly visible oversize markers define roadsides by its 179 glass element count. Single or double sided, with or without metal supports.

Bonds perfectly to asphalt and concrete surfaces.

TCB-10 City Studs are available with metal supports for additional strength when installed in sensitive areas.

179 Glass elements per side

**STREET LEVEL MARKERS TCB-15**

**DIMENSIONS**  
Length 8.6" Width 5.9" Height 11.2"

Lane Dividers are temporary delineators that provide excellent day/night time warning guidance to road users.

Equipped with a flexible rubber shaft adding a reliable means to stop dangerous lane changing.

Absolutely traversable, even in heavy traffic areas.

Single or double sided. With or without rubber shaft. Shaft equipped with stud reflector for enhanced visibility.

TCB-15 Delineators are available with metal supports for additional anchoring strength in sensitive areas.

Divider stud without rubber shaft.

128 Glass elements per side
