

**LINE GUIDES - B170**

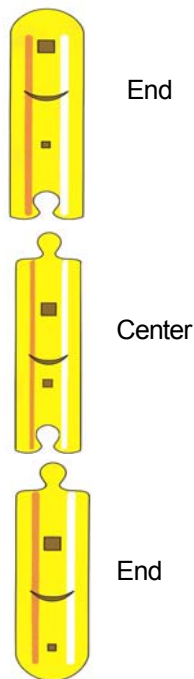

**Promote traffic flow with Lineguides and Saddle Posts.**

**VERTICAL DELINEATION**

Lineguides are a portable temporary or permanent curbing system designed to channelize vehicles through designated passageways while discouraging motorists from lane changes. Constructed of 70% plastic and 30% recycled rubber Lineguides are reinforced with steel rods for strength and durability. Lineguides are yellow or white lacquered and can be anchored or glued to the road.

Lineguides can be equipped with universal mount Saddle posts (B170) Matching Mini-Curbs can be used for identifying median strips or adding sequential road separations. Both Lineguide and Mini-Curbs have pre-cut holes for optional Reflective T-Supports for enhanced night visibility.

**LINEGUIDES**  
Center & End Pieces  
Length 39.37"

Create turns, rotaries and split one way streets into two way traffic. Lineguides interlock similar to a puzzle allowing limitless linear attachment. Lineguides may be removed individually to create open passages.

**B170 SADDLE POST**

**B170 SADDLE POST**

Height: 28.7" . Dia: 4.5".
