

PEDESTRIAN GATEWAY

CROSSWALKS

DESIGN

Crosswalk marker posts employ a single piece design utilizing a one piece anchoring system that assures the post's position, eliminating theft and projectiles. Soft ethylene materials, combined with structural resistance, provide a "Soft impact" when struck, allowing the post to rebound to its vertical position without need the of springs or cords.

Soft and flexible

Resists ripping and folding forces

The K71 post is 29 inches in height and 8 inches in diameter with two (2) 4 inch reflective collars for 360 degree reflectivity. The post's overall dimensions offer a highly visible traffic control device that meets and exceeds NCHRP 350 specifications.

PLACEMENT

The 6 piece marking kit utilizes two (2) posts to mark the center of the road and the remaining four (4) posts to mark the entrance and exit points of the crosswalks. Posts located on the extremities of the crosswalk can be installed on curbs or on the street itself. Strategic placement of crosswalk posts on curbs and turns help define crosswalk locations.

Visibly Enhance Crosswalks for pedestrians and vehicles.

VERTICAL DELINEATION

The Pedestrian Gateway is a multi application, crosswalk marking system that can be used individually or as a complete six piece marking kit for enhancing pedestrian and motorist awareness. It is designed to vertically mark crosswalks regardless of the condition of ground markings (worn out or non existent).

Entrance and exit points guide pedestrians through walkways rather than crossing them diagonally.

The ability to mark crosswalks with six (6) posts enhances their locations considerably as apposed to single traffic devices that are centered in the road. The six post crosswalk kit helps channelize vehicles away from the curb and the center of the road, forcing approaching motorists to slow down and negotiate through a crossing zone. This application also offers perspective and depth to all crossing pedestrians.

DAY AND NIGHT

MULTIPLE CROSSWALKS

CENTER POSTS

The Pedestrian Gateway kit includes two center posts with logos and lettering. Popular messages include: SCHOOL, STOP, STATE LAW and FINE \$100.00. Logos and donor's names may be affixed upon request.

Reflective markings

3M Reflective bands

BENEFITS

- Identify crosswalk boundaries
- Control traffic
- Enhance crosswalks from a greater distance
- Discourage illegal parking
- Temporary or permanent

WINTER

Center posts are removed while curb side mounted posts designate crosswalk entrances when street markings are snow covered.

ANTITHEFT

T-bar is used to secure crosswalk post to the pavement. Post can be installed and removed in less than 30 seconds.

CROSSWALK LOCATION SIGNS

Direct pedestrians to the nearest crosswalk location with reflective signs in the shape of a crosswalk post. Item # 7110-CW-FYG

Kits Include: ● Kit 1 0450-YW ✕ Kit 2 0455-YW ▲ Kit 1 0460-YW
