US REFLECTOR
K71 FLEXIBLE POST

SELF RE-ERECTING

The K71 flexible marker post is a single piece design traffic calming device that is manufactured with a unique blend of polyethylene and UV inhibitors. The combination of these materials offers exceptional softness characteristics and remarkable re-erecting memory.

Strong and durable with no springs or pivoting devices, the K71 takes just seconds for removal and reinstallation.

Bright vibrant colors bring extra clarity to all types of safety installations.

Designed for 65 M.P.H. impacts, the K71 can be utilized in a wide range of safety enhancement applications, whether temporary or permanent.

PRACTICAL
Unique T-Bar anchoring system eliminates the need for heavyweight bases and devices.

T-Bar provides for controlled installations and removals, thereby eliminating theft and falling devices.

Post installs in less than 15 seconds.

OPTIONAL Stand alone rubber base

BASE can be used alone or glued to surface

SIGNAL POSTS

CHARACTERISTICS

K71 Self Re-Erecting Marker Posts are built to resist impacts over 65 m.p.h. continuously without damaging the post or vehicle. Designed for superior traffic control, the K71 Marker Post “gives” under impact and re-erects into its vertical position without the use of springs or pivoting devices.

The K71 Marker Post takes just seconds for removal and reinstallation, protects work site personnel and provides long-term safety for all road users.

ALL-ROUND RUGGEDNESS single piece design, self-re-erecting Marker Post.

The metal sleeve is pre-bonded into the pavement or concrete surface. This method provides a waterproof, anti-pullout bond that eliminates infiltration.

Products include easy to follow Installation instructions

UNIVERSAL - RUGGED - COMPACT - DURABLE - FLEXIBLE - SOFT

One piece anchoring
Designed for quick and effortless intervention.

Excellent resistance to impacts.
K71 Flexible Posts continue to perform even when struck at speeds exceeding 65 m.p.h. with their specially designed anchored base.

Easily Reuseable.
The Flexible Marker Post can be used multiple times by simply adding new sleeves in different locations.

Temporary Markers
Promote traffic flow while enhancing safety without having to worry about fallen or stolen barrels or cones.

INSTALLATION MATERIALS

A: T-Bar
Installs and removes K71 flex posts.

B: Metal pavement sleeve
Use to anchor K71 post to pavement and concrete.

C: Metal reinforcement screen
Use when pavement or concrete is less than 6 inches in thickness.

VERTICAL POSTS
FLEXIBLE & SEMI RIDGED SOLUTIONS

BENEFITS

- 4 MODELS
- 3” up to 8” widths
- 15” up to 40” heights
- ANCHOR or ADHESIVE bases
- FLEXIBLE & SEMI RIDGED
- DAY & NIGHT VISIBILITY
- QUICK & EASY INSTALLATION
- TEMPORARY OR PERMANENT
- OPTIONAL LED BASE & SIGN ATTACHMENT

CHANNELIZE vehicles with the RIGHT post for the RIGHT application

US Reflector has developed a “One of a Kind” approach to traffic safety when it comes to choosing the right post for the application.

- FLEXIBLE: Use for high speed impacts, soft impacts and all purpose traffic calming
- SEMIRIGID: Low speed areas with traffic abuse, urban markings, discourage parking
- TOUGH POST: Energy absorbing post unbendable with human intervention. Stop traffic abuse

All US Reflector posts are available in several colors, heights and widths. All posts use single point flush mount socket anchors for quick installation and removal. Optional adhesive base models available. All posts are equipped with reflective film in your choice of color allowing maximizing day & night time visibility to urban and rural aesthetically engineered environments. Simply choose anchor or adhesive base according to the application and it flexibility.

NEW

US Reflector’s PC post now comes with an LED Solar Base equipped with front and side LED’s for full 180° approach visibility alerting motorists of a crosswalk zone and dangerous areas. Optional sign support allows sign attachment for cutting edge traffic & Pedestrian safety management
