

Economical, self adhering, easy to use,  
Diamond grade reflective film.

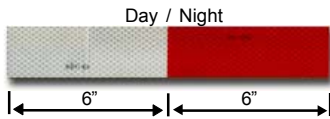

# REFLECTORS

Studies show that conspicuity markings reduce the probability of serious accidents. Drivers rely on what they are able. Vehicles marked with reflective sheeting provide better visual information, allowing faster, more accurate decision making by drivers.

Instant "peel-off" liner for "Quick stick" applications on virtually any surface.

## REFLECTIVE FILM

### CONSPICUITY SHEETING MODEL C1

C1 Conspicuity Diamond Grade reflective films are designed to illuminate and render vehicles safer for both day and nighttime use. Wide angle micro prism lens assures enhanced day and night visibility for all vehicles.

Available in 12" red/white strips and 50 yard rolls

### MODEL C2

C2 Daytime Conspicuity sheeting can be used on vehicles and equipment randomly in both inside and outside environments.

11" Red strip promotes additional attention to bright day time environments distinguishing a vehicle's presence.

Available in 18" red/white strips and 50 yard rolls

### MODEL C3

C3 Conspicuity has been designed for applications requiring solid colors. Reflective prismatic film is sealed and backed with an aggressive, pressure sensitive adhesive and clear poly liner for instant adhesion to virtually all surfaces.

Available in 12" strips and 50 yard rolls  
Sizes 1" - 1.5" - 2" - 3" - 4"

### MICRO PRISM DIAMOND GRADE REFLECTORS

### MODEL C6

### MODEL C5

### DIAMOND GRADE REFLECTORS

Diamond Grade reflectors feature highly reflective prismatic lenses in a durable, transparent, synthetic resin sealed medium, backed with an aggressive, pressure sensitive adhesive and clear poly liner.

### FEATURES

Superior angularity beyond 60 degrees.

Reflectors are available in:

- Bright red
- Amber
- White

Designed for brightness and superior visibility.

C5 and C6 are available individually or in rolls of 100. Sizes: C5 3.5" x 2". C6 3"

MODEL	ITEM #	1"	1.5"	2"	3"	4"

Scotchlite™ reflective sheeting for all applications requiring enhanced visibility.

# SIGNALIZATION

High Performance retroreflective sheeting provides motorists with unsurpassed color clarity during the daytime and brilliant reflectivity at night. With a large variety of colors and styles, US Reflector can provide the proper film for the specifications needed.

Scotchlite™ performance films are available in four (4) grades. Engineer grade for workzone and temporary applications as well as vehicle markings. High Intensity for a long lasting reflective sign surfaces with greater light reflex. Diamond grade films for a bright, durable prismatic retroreflective surface for use on traffic control signs and Fluorescent Diamond grade for brilliant superior daytime visibility.

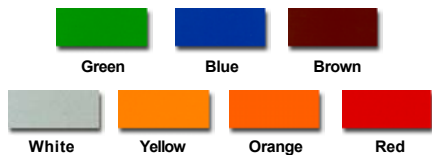

## REFLECTIVE FILM

### ENGINEER GRADE

SCOTCHLITE™ Engineer grade sheeting with pressure sensitive adhesive backing is a self adhering, durable, retroreflective enclosed lens sheeting designed to illuminate surfaces such as traffic control devices, signs vehicles and any other surface that may require a cost effective application.

#### Engineer grade

#### Prestriped Barricade Sheeting

3M™ Scotchlite™ Work Zone Sheeting is a impact-resistant, orange and white pre-striped encapsulated lens sheeting with a pressure sensitive adhesive for plastic substrates and work zone barricades.

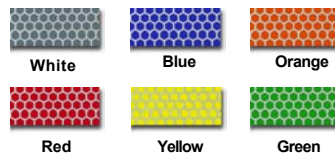

### HIGH INTENSITY

SCOTCHLITE™ High Intensity reflective sheeting with pressure sensitive adhesive backing is self adhering flexible, wide angle, encapsulated lens sheeting for use on reboundable, plastic substrate work zone traffic control devices such as drums, cones and flexible bollards.

#### High Intensity grade

### DIAMOND GRADE

SCOTCHLITE™ Diamond grade reflective films are available with both standard and fluorescent capabilities. They contain a self-adhering, pressure sensitive adhesive backing for instant adhesion. Fluorescent films are used where daytime visibility is required providing superior reflectivity during nighttime and inclement weather conditions.

#### Diamond grade

#### Fluorescent Diamond grade
