## K71 FLEXIBLE POST

### SELF RE-ERECTING

The K71 flexible marker post is a single piece designed traffic calming device that is manufactured with a unique blend of polyethylene and UV inhibitors. The combination of these materials offer exceptional softness characteristics and remarkable re-erecting memory.

Strong and durable with no springs or pivoting devices, the K71 takes just seconds for removal and reinstallation.

Bright vibrant colors bring extra clarity to all types of safety installations.

Designed for 65 M.P.H. Impacts, the K71 can be utilized in a wide range of safety enhancement applications whether temporary or permanent.

### PRACTICAL

Unique T-Bar anchoring system eliminates the need for heavy weight bases and devices.

Post installs in under 15 seconds

T-Bar provides controlled installations and removals eliminating theft and falling devices.

**ALL-ROUND RUGGEDNESS** single piece design, self-re-erecting Marker Post.

## VERTICAL DELINEATION

K71 Self Re-Erecting Marker Posts are built to resist impacts over 65 m.p.h. continuously without destruction to the post or a vehicle. Designed for superior traffic control, the K71 Marker Post "gives" under impact and re-erects back into its vertical position without the use of springs or pivoting devices.

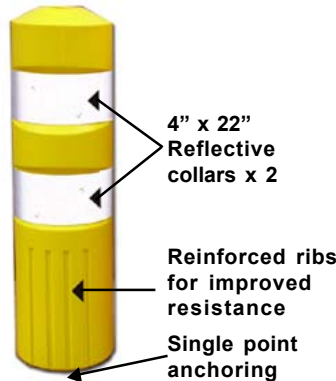

The K71 Marker Post takes just seconds for removal and reinstallation. Protect work site personnel and provide long-term safety for all road users.

### SIGNAL POSTS

### CHARACTERISTICS

Optional anchoring components such as Lag bolts, Quick fit and glue down bases allow the K71 post to be affixed to most all surfaces.

Recessed collars provide long collar life Posts are available in: White, yellow, orange, green, blue brown and black.

### RAISED CURBS

### ALL AROUND RUGGEDNESS

Self-Re-Erecting Marker Post both rugged and flexible withstands pulling, shearing and folding forces. Insensitive to weather and temperature differences.

### ANTI-PULL ANCHOR SYSTEM

The K71 Self Re-Erecting Marker Post is equipped with a single anchor bolt that screws easily into a pre-installed flush mounted metal sleeve.

The metal sleeve is pre-bonded into the pavement or concrete surface. This method provides a waterproof anti-pullout bond that eliminates infiltration.

### Products include easy to follow Installation instructions

DESCRIPTION	WEIGHT	ITEM #						COST
		white	orange	yellow	green	blue	black	
K71 Self Re-Erecting post	5 Lbs	0400-W	0400-O	0400-Y	0400-G	0400-B	0400-BLK	\$64.95
Reflective collars		Choice of: -W (white) -Y (yellow) -R (red) -O (orange) -G (green) -B (blue)						Included

ACCESSORIES	WEIGHT	ITEM #	DESCRIPTION	COST
T-Bar	3 lbs	0925	Installs and removes K71 flexible post	\$38.00
Metal pavement sleeves	4 oz.	0926	Anchors K71 post to pavement and concrete	\$ 9.90
Anti debris set screw	2 oz.	0935-M	Protects pavement sleeve during K71 removal	\$ 2.18
Metal reinforcement screen	2 oz.	0930-SCRN-H	Use when surface is less than 6 inches thick	\$ 3.80

Installation requires adhesive -

Adhesive is available in 5 oz., 8 oz., 11.1 oz., 27.9 oz. and 37 oz. tubes

# HARDWARE

**UNIVERSAL - RUGGED - COMPACT - DURABLE - FLEXIBLE - SOFT**

**One piece anchoring**  
Designed for quick and effortless intervention.

**Reflective film**  
Resessed collars for reflective film protection.

**Excellent impact damage resistance.**

Flexible Posts continue to perform even when struck at high speeds exceeding 65 m.p.h. with its specially designed anchored base.

**Easily Reuseable.**

The Flexible Marker Post can be used multiple times by simply adding new sleeves in different locations.

**Temporary Markers**

Promote traffic flow while enhancing safety without having to worry about fallen or stolen barrels or cones.

## INSTALLATION MATERIALS

A-5

Installation based on 11/16 Carbide drill bit

A-5 Installs 4 to 5 sleeves  
A-8 Installs 6 to 8 sleeves  
H-11 Installs 9 to 11 sleeves  
A-28 Installs 19 to 24 sleeves

A-8

H-11

A-28

A-5 Self dispensing 5 oz. cartridge  
A-8 8 oz. cartridge requires manual pump gun and nozzles  
A-11 11.1 oz. cartridge requires manual pump gun only  
A-28 28 oz. cartridge requires manual pump gun and nozzles

\*Adhesive cure times may vary depending on outside temperatures  
Typical workable time 15 minutes.

A

B

C

**A: T-Bar**

Installs and removes K71 flex posts.

**B: Metal pavement sleeve**

Use to anchor K71 post to pavement and concrete.

**C: Metal reinforcement screen**

Use when pavement or concrete is less than 6 inches in thickness.

Item #	Description	Cost
0928-A5	5 oz. Adhesive	\$ 19.00
0929-A8	8 oz. Adhesive	\$ 19.65
0929-AG	8 oz. Manual pump gun	\$ 111.58
0929-AN	8 oz. nozzles	\$ 2.15
0935-H11	11.1 oz. Adhesive	\$ 37.50
0935-HG	11.1 oz. Manual pump gun	\$ 81.50

## QUICK - FIT

Instantly redirects motorists utilizing Quick-Fit connecting socket.

## VERTICAL DELINEATION

Designed for reducing a work crew's time on the road, the Quick-Fit glides itself into a pre-installed flush, mounted aluminum tube located on the roadway surface.

The Quick-Fit socket set allows lane changes to be made instantly without any concern for projectiles or fallen traffic devices.

Replace and remove K71 Self Re-Erecting Marker Posts in seconds by simply lifting the post out from its base tube. Designed for highways, toll booths, check points and all other applications requiring immediate interventions.

### IMPACTS

No changes in post flexibility, the Quick-Fit allows the K71 marker post to receive impacts in excess of 65 m.p.h. without altering, or repositioning the post.

The Quick-Fit method is designed to keep the post securely in place while allowing road crews to remove or reinsert a post instantly.

### HOW IT WORKS

Pressure from above ground impacts lock the Quick-Fit socket into position allowing the K71 to flex and re-erect to its designed characteristics.

### USES

- Toll Booths
- Lane Changes
- Expressways
- Lane blocks

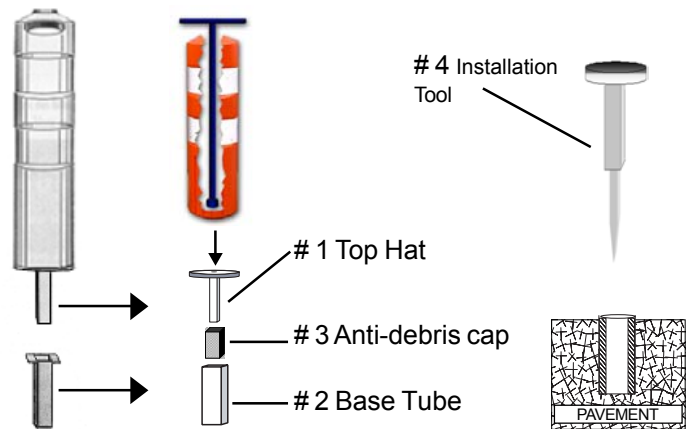

### DURABLE

Quick-Fit is manufactured from aluminum, providing a strong, durable corrosion resistant base support.

K71 Flexible marker posts provide motorists with a highly visible traffic control device that can be used to channelize vehicles and promote traffic calming. The K71 marker post is designed to resist high speed impacts utilizing a metal pavement sleeve or Quick-Fit instant socket set for areas that require immediate lane closings or changes.

### QUICK-FIT CONNECTION KIT

### INSTALLATION:

Drill a 1 3/16" x 61/2" hole into asphalt or concrete.

Utilizing a hammer and (# 4) installation tool, insert square base tube (#2) into predrilled hole. Strike the protective hand plate on installation tool. The base tube will be forced into a locked position.

Pre-install top hat (# 1) by inserting the T-Bar down to bottom center of the post. Tighten appropriately. Post is now ready to be inserted into the ground base tube. Utilizing the (# 3) protective cap will prevent debris from entering the base tube allowing easy insertion at a later date.

DESCRIPTION	ITEM #		COST
	Round	Square	
Complete kit	0926-KIT-RD	0926-KIT-SQ	\$ 22.00
Top Hat	0926-RD-T	0926-SQ-T	\$ 15.00
Base tube	0926-RD-B	0926-SQ-T	\$ 4.00
Protective cap	0925-RD-CAP	0926-SQ-CAP	\$ 3.00
Installation Tool	0926-MT	(Fits both units)	\$ 55.00

## WATER BALLAST

**K75 CA Multi-use hand carry posts for all applications.**

## VERTICAL DELINEATION

K71 CA Hand carry posts are a portable water ballast delineation device that is lightweight and easy manageable. Large handles facilitate portability even when filled with sand or water. Posts have two 4 inch recessed reflective collars providing the necessary distinct visibility for day/night use.

Can be used for school and road crossings.

### K75 CA HAND CARRY POSTS

Equipped with two 4 in. reflective collars

Choice of reflective film

Portable, easy to carry sign posts  
Create any wording or attach existing signage

**Officer on Duty**

height 32.9 in. round 7 1/4 in. base 10.3/4 in.

**K75 CA Posts can be equipped with Specialized SIGNS, MARKINGS and LOGOS**

## BENEFITS

- IDENTIFIES CROSSWALKS
- SEPARATES TRAFFIC FLOW
- LIGHT WEIGHT AND PORTABLE
- CAN BE FILLED WITH WATER, SAND OR ROCK SALT
- CREATE UNIFORMITY WITH K71 FLEXIBLE POST
- WILL NOT BE CONFUSED WITH ORANGE CONSTRUCTION DEVICES

### PLASTIC COLORED CHAINS

Red and white chain for improved pedestrian control.

Colors: Red and White, Yellow or White  
Link Length: 1.5 inch and 2 inch

### 16 LBS RUBBER BASE

Solid rubber bases provides additional anchor weight.

Fits standard size cones with 8 inch diameter.

Easily chain off areas with colorful plastic chains.
