

RETROREFLECTIVE SHEETING AND STREET MARKINGS

High Performance retroreflective sheeting provides motorists with unsurpassed color clarity by day and brilliant reflectivity by night. With a large variety of colors and styles, US Reflector can provide the proper film for the specifications needed.

REFLECTIVE FILM

REFLECTIVE SHEETING

Because Reflective film is available in many colors, types and made from a hand full of manufactures, it can be confusing choosing the proper film for the application.

US Reflector has taken the guess work out helping you choose the quality film needed for your ongoing projects.

Reflective Film is also complex, each film has different characteristics that make them unique from each other, visual appearance, adhesion and surface type.

3M, Stimsonite and Avery are some of the choices we carry.

STIMSONITE

FLUORESCENT YELLOW GREEN FILM

Fluorescent Yellow Green sheeting gives superior visibility 24 hours a day

Because of its improved fluorescent and reflective qualities, Yellow Green sheeting does a better job of commanding driver attention in both daytime and nighttime conditions and in all kinds of weather.

Daytime visibility studies have shown these new signs can be seen at distances up to 40 percent further than standard yellow colors. At night, the Fluorescent Yellow Green signs can be detected at distances up to 50 percent greater than standard signs.

Fluorescent Yellow Green signs are also more visible at dawn and dusk, as well as in bad weather-times when it is particularly difficult to see pedestrians, children and cyclists.

To discuss a Fluorescent Yellow Green signing program for your community, call today. We can give you a warranted product that will make your roads safer for motorists-and for those who share the roadway.

THERMOPLASTIC PAVEMENT MARKINGS

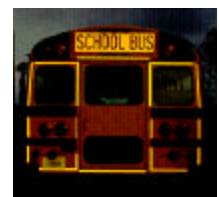

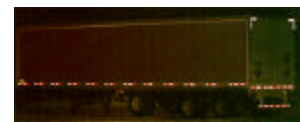

A new generation of High Performance Heat-fused Thermoplastics Pavement Markings

No adhesives required, TPM melts and interlocks with the substrate completely conforming to the pavement surface.

FEATURES

- Installes in cold or hot weather
- Impervious to oil and grease
- Quick simple installation
- Bold, Day and night visibility
- Widest range of colors, thicknesses
- No required adhesives
