Advanced warning

US REFLECTOR LED Solar Base for PC Posts are designed to illuminate the foot of the PC delineator post enhancing its presence by using front and side LED's warning motorists in advance of sensitive areas such as crosswalks, road divisions, rased medians and dangerous turns.

No anchors or glue required

The LED solar base anchors itself by using the PC posts existing anchor system.

The Guide-Star solar L.E.D. base is the ultimate addition to stand alone traffic posts representing a new milestone in modern traffic calming technology. Easily transform crosswalks and hazard areas into visible night warning devices. No wires, no additional holes makes the Guide Star an excellent choice for all road safety concerns.

With the option of flashing and sustaining LED color choices, Guide Star easily adapts to a multitude of applications such as security and toll booth areas, one way streets, road obstacles.

- Clean reusable energy
- Automatic flashing
- Quick easy installation
- No maintenance required
- No batteries to change ever
- Designed for daily traffic abuse
- Improve lane visibility in congested areas
- Bring modern road technology to nonexistent or wornout markings

Guide Star effectively responds to the demands of advanced traffic safety and engineering requirements for tomorrows roadways.

LED Solar Base is equipped with front and side LED's allowing 180° approach visibility

Engineered to withstand extreme traffic yet provide maintenance friendly traffic control solutions.
