GUIDESTAR SOLAR LED PAVEMENT MARKERS

GSX Series
Illuminating tomorrows roadways TODAY

- Clean reusable energy
- Automatic flashing or constant ON
- Over 30Ton compression strength
- Ultra intense 3X LED’s
- External magnet switch stores power
- Quick easy installation
- No maintenance required
- No batteries to change ever
- Designed for daily traffic abuse
- Improve lane visibility in congested areas
- Bring modern road technology to non visible or worn out markings

GSX LED Solar Markers are the most effective marking system in the industry providing a visible, audible, noise warning device for all drivers and roadways. Designed to provide motorists advanced visibility and alert them of danger such as wrong-way, center lines, turns, fire hydrants and all other applications requiring enhanced visibility.

US Reflector’s GSX solar road markers are designed with recessed lenses that are built from the inside of the marker providing exceptional reflective life performance while reducing tire lens impact when compared to standard markers. No maintenance required, LED markers are built with intelligent and sophisticated circuitry and powered with the advanced technology providing low electric consumption and exceptional operating life. GSX markers are equipped with external magnet switch that activates the marker when being installed.

GUIDESTAR®

CHARACTERISTICS
- Extreme 30 ton Resistance
- Illumination >110 hours
- Solar powered
- Smooth aluminum frame
- Adhesive or anchor

BENEFITS
- Self Illuminating
- Advance Hazard warning
- Quick install

GSX SERIES
GuideStar GSX pavement markers are a high power ultra bright LED marker designed for performance in abusive road environments. GSX series leaps forward in technology with its IONintel power chip package providing more than 51 hours operation with just 4 hours of sunlight + 30 tons of compression resistance and over a mile of advanced night visibility making the GSX markers are the new standard to road illumination.

Reflectors are secured from inside the marker frame
3X the LED's exceed standards for brilliant night visibility
Heavy Duty aluminum frame
Ergonomic Smooth edge design
IONintel solar panel and chip electronics package
Anchor holes or adhesive bond for dual fixation
External power storage switch for on-site activation
GSX-4 Double sided GSX-2 Single sided
GSX-6 Double sided GSX-3 Single sided
GSX-ST3 Double sided GSX-ST6 Single sided

High powered light diodes draw, but not distract from the driver's attention to the road. LED Diodes are combined with a prismatic reflector for passive reflex technology
Maximize a driver's ability to maneuver through dark spots, dangerous areas or wet roads. Cost effective, easy to install and maintenance-free.
**Effective Warning**

LED lights are the best option for road markers because they provide a significant increase in advance warning for drivers. GSX LED markers with IONintel chip electronics use very little energy, and provide the utmost in safety and visibility. Unlike conventional reflective markers, the GuideStar LED Solar marker is visible up to a mile away and beyond helping to prevent accidents. GSX dual illumination Markers emit and reflect light which is extremely important especially on road sections that are unable to pickup an approaching headlight beam especially in wet and rainy weather.

Blue LED markers are ideal for fire hydrant locator’s. Alternating blue flashing LED’s directs attention when searching for hydrants is critical. Installs on curbs or roadways.

---

**ADVANTAGES**

**High Reliability**
The highly visible Solar LED Road Marker employs a heavy duty design that is long lasting, impact resistant, and engineered to survive in virtually any weather condition.

**Why Solar Energy?**
Solar energy is consistent and will power the units at a fixed rate. Power generation is possible even during rainy or cloudy weather. Solar energy does not require batteries, making it the most economical way to keep drivers safe.

**Full Autonomy**
Each unit is completely independent and self-directed. It does not depend on anything other than ambient light (i.e. sunlight, partial light, lamps) in order to work properly.

**Long Distance Visibility**
Visible up to one mile, the Solar LED Road Marker is the perfect safety addition to any road or highway.

**Flashing Function**
Designed to flash or always ON in low visibility and at night, the Solar LED Road Marker assists drivers in seeing the road, preventing accidents and injuries.

**Easy to Install**
Each Solar LED Road Marker takes only a few minutes to install. Simply clean the road surface and affix the Solar LED Road Marker with a high strength adhesive or use the side anchor holes for mechanical fixation. That’s all there is to it!

GSX-2 / GSX-4
Self contained solar pavement marker is available in single or double sided. Built with aluminum housing with embedded reflector and 2 or 4 LED illumination provides high visibility up to 1 mile (1600m). Smooth sand blasted curved surface for long life wheel impacts. IP68 waterproof electronic integration ensures power chips & power supply are fully protected from water and contaminates. Delivered with external magnet switch for “On-site” activation.

Dimensions: 4” x 4.4” x 0.86” (101 x 112 x 22 mm)
Illumination modes: Flashing or Always ON
Compression resistance: 25 Tons

GSX-3 / GSX-6
High visibility Solar LED Road Marker employs a heavy duty aluminum design that is long lasting, impact resistant, and engineered to survive in virtually any weather condition. Self contained solar pavement marker is available in single or double sided. Built with embedded reflector with 3 or 6 LED’s provides exceptional visibility greater than 1 mile (1600m). Smooth sand blasted curved surface for long life wheel impacts. IP68 waterproofing ensures electronic chips & power supply are fully protected from water and road contaminates. Delivered with external magnet switch for “On-site” activation.

Dimensions: 4.9” x 4” x 1” (125 x 105 x 26mm)
Illumination modes: Flashing or Always ON
Compression resistance: >30 Tons

GSX-ST3 / GSX-ST6
Heavy Duty aluminum housing with self contained solar LED Road Marker is designed with an anchor stem for roads were vehicles brake-speed such as toll booths, winding roadways, merging lanes, sharp turns, truck lanes and parking lots where pivoting tires may pull off surface mount studs. Long lasting, and impact resistant, the GSX Series is engineered to survive in virtually all weather conditions. GSX-ST series marker is available in single or double sided, flashing or constant ON. Embedded reflector with 3 or 6 LED’s provides exceptional visibility greater than 1 mile (1600m). Smooth sand blasted curved surface for long life wheel impacts. IP68 waterproofing ensures electronic chips & power supply are fully protected from water and road contaminates. Delivered with external magnet switch for “On-site” activation.

Dimensions: 4.9” x 4” x 1” (125 x 105 x 26mm)
Illumination modes: Flashing or Always ON
Compression resistance: >30 Tons
## GSX Series Solar LED Pavement Markers

### GSX-2 / GSX-4
- **Material**: Acrylic reflector, Aluminum frame
- **Size**: 4” x 4.4” x 0.86” (101 x 112 x 22 mm)
- **Illumination modes**: Flashing or Always ON
- **LED Quantity**: Single sided 2
- **Power supply**: 1.2V 600 mAh NI-MH battery
- **Working time**: One day charge 110 hours
- **Compression resistance**: 25 Tons

### GSX-3 / GSX-6
- **Material**: Acrylic reflector, Aluminum frame
- **Size**: 4.1” x 4.9” x 1” (105 x 125 x 26 mm)
- **Illumination modes**: Flashing or Always ON
- **Visual distance**: Over 1 mile
- **LED Quantity**: Single sided 2
- **Power supply**: 1.2V 900 mAh NI-MH battery
- **Working time**: One day charge >70 hours
- **Compression resistance**: 30 Tons

### GSX-ST3 / GSX-ST6
- **Material**: Acrylic reflector, Aluminum frame
- **Size**: 4” x 4.4” x 1” Stem 1.18” x 1.97” (105 x 125 x 26 mm-Stem 30mm x 50mm)
- **Illumination modes**: Flashing or Always ON
- **Visual distance**: Over 1 mile
- **LED Quantity**: Single sided 2
- **Power supply**: 1.2V 900 mAh NI-MH battery
- **Working time**: One day charge >70 hours
- **Compression resistance**: 30 Tons
