K72 FLEXIBLE STYLE Post

STYLE posts are a soft and flexible marker post designed to add aesthetics to municipal traffic calming applications. Designed to look like steel posts, the K72 Posts are easy to install and can be used for temporary or permanent applications.

Equipped with a 4" reflective band for day night visibility. The Style posts unique design brings a new generation of traffic control devices with functional creativity.

Not all applications require bright orange designating past or present construction. Safety Style posts bring character and definition to city, and municipal applications discouraging illegal parking.

When bright orange just is not the solution

k72 STYLE POST for walkways, bicycle paths and urban delineation

URBAN IDENTIFICATION POSTS

STYLE POSTS

New STYLE posts are uniquely designed to look like solid stanchions yet offer flexibility characteristics.

STYLE posts install identically to the K71 posts allowing easy removal and replacement in just a few seconds with the T-Bar installation and removal tool

Available in dark brown and black, includes reflective film in all standard colors

The K72 Style post is a single piece design traffic calming device that is manufactured with unique blend of polyethylene and UV inhibitors. The combination of these materials offers exceptional softness characteristics and remarkable re-erecting memory. Strong and durable with no springs or pivoting devices, the K72 takes just seconds for removal and reinstallation.

The K72 can be utilized in a wide range of safety enhancement applications, whether temporary or permanent.

Designed to be installed in direct contact with a pavement or concrete surface using a unique anchoring method allowing immediate installation or removal at any time with the use of a T-bar.

OPTIONAL Stand alone rubber base for temporary applications.

Base can be glued permanently yet allow for post removal without damage to vehicle tires.

T-Bar provides for controlled installations and removals, thereby eliminating theft and failing bases bonded with adhesive.
