

DOUBLE WIDTH TRAFFIC ISLANDS

Models

MTI-1500 5 ft wide

MTI-1800 6 ft wide

MTI-2000 6.5 ft wide

MTI-2400 8 ft wide

PEDESTRIAN REFUGES

US Reflector's 2-Piece Modular Traffic Islands (MTI) are a universal lane separator system that allows roadways to be quickly divided into crosswalk refuge areas or create lane dividers that promote traffic calming by channelizing vehicles through a designated area.

Manufactured from solid recycled rubber, our modular traffic islands install directly onto concrete or asphalt road surfaces with anchors and/or adhesive. Available in 4 widths; 5.5 ft, 6 ft, 6.5 ft and 8 ft. which easily accommodates different road widths for quick deployment of pedestrian refuge islands without the need for excavation or heavy equipment.

Modular Traffic Islands have a molded in steel plate to accommodate a wide range of signage and other street signalization devices including: keep left signs, bollards, refuge posts, and lighting columns.

PEDESTRIAN REFUGES

Sign Attachments

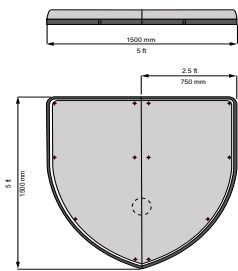

Each of our Traffic Islands can be configured to form Pedestrian Refuge Islands incorporating different surface mounted signalization devices enhancing a motorists approach awareness. Modular Traffic Islands are a quick and easy crossing solution to enhance pedestrian crosswalk safety.

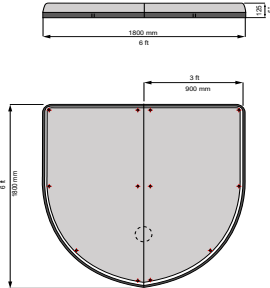

PEDESTRIAN REFUGES

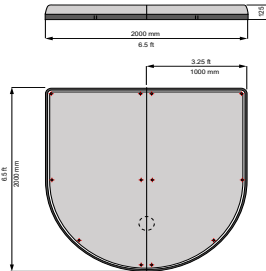

Models

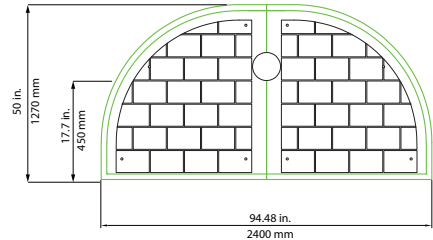

MTI-1500
5 ft x 5 ft

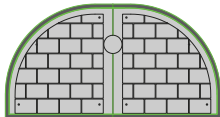

MTI-1800
6 ft x 6 ft

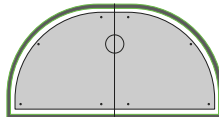

MTI-2000
6.5 ft x 6.5 ft

MTI-2400
4.1 ft x 8 ft

Heritage / Faux Brick

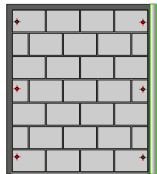

Smooth

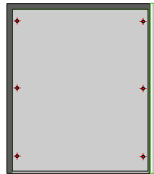

Surface Finish Options

All traffic islands are available with a smooth surface or optional paver design for urban and conservation areas.

Modular Extensions

Heritage / Faux Brick

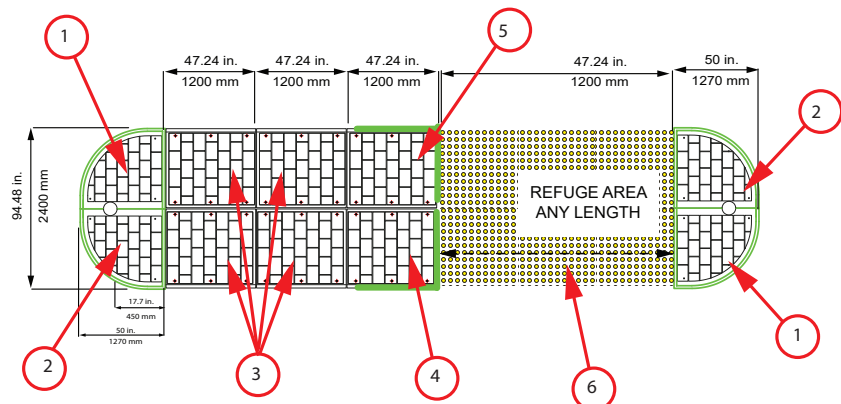

Smooth

Traffic Island Extensions

Easily extend a traffic island as long as needed. Create multiple refuge cross points along the center of the roadway.

Example Refuges layouts with Extensions

1. Right hand rounded end
2. Left hand rounded end
3. Straight extension
4. Right angle corner piece
5. Left angle corner piece
6. Tactile "peel and stick" pads

TRAFFIC ISLANDS

Island Refuge Examples

Single block traffic islands offer maximum stability and impact absorption, and like all our products they require no excavation allowing installation in a couple hours offering excellent cost and time benefits compared with constructed, concrete, asphalt and modular alternatives.

US Reflector durable islands incorporate a universal sign fixing plate and underside channeling enabling them to follow the curvature of the road, as well as aid drainage and allow access for cables/conduit if required.

TRAFFIC ISLANDS

Refuge Installation

Place refuge pads on roadway

Drill and anchor in place

Place tactile tiles in refuge area
